Hello, my name's Polina Malykh and today I'll tell you about some sights that we often mustn't make. I will take you on a tour on graffiti pictures in Sarov.

Sarov is a small town, but when we walk in the streets of our town, we know that in Sarov there are many people that like to create art and we can see it on the walls. In Sarov there are a lot of graffiti, but can we say these pictures on the walls are sights?

We can see a lot of graffiti in Silkina Street. There is a wall where people painted many graffiti. These pictures are different and not always lovely. I don't think they are great sights.

But when we go further and come to the new area of the town, we can see graffiti which are a work of art!

On the wall of puppet theatre "Kuznechik", we can see a great graffiti. In this picture you can see a girl. She is sitting on the ground and catching rainbow. There are a lot of colours in this picture: red, yellow, green. When I look at it, I feel excited.

Next to Nekrasova Street, 5, there is another amazing graffiti! In 2018, artist Anton Klimov painted a war episode. In this picture, you can see soldiers. They are feeding a little girl. This is a black and white picture, but it is very bright. This painting shows that in the world there are kind people any time.

Well, here my tour finishes, and I want to say that it is important not where we paint, but what we paint!
